

[https://www.tradingview.com/gopro/?source=header\\_go\\_pro\\_button&feature=start\\_free\\_trial](https://www.tradingview.com/gopro/?source=header_go_pro_button&feature=start_free_trial)

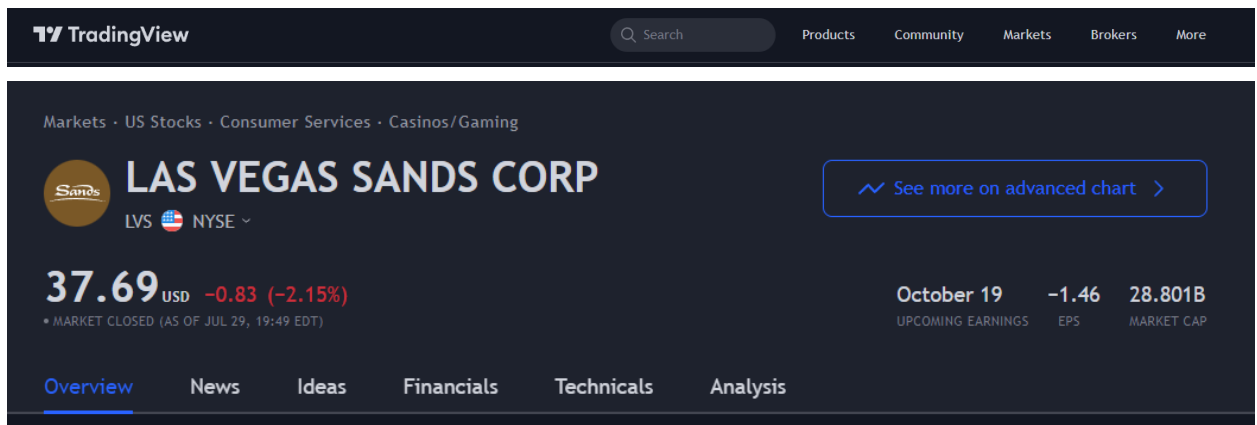

1. Make an account at the link above and scroll down to select the try free version

## Need something a little simpler?

You don't have to choose a plan straight away. Get our free Basic account to explore what's what first.

[Try free basic](#)

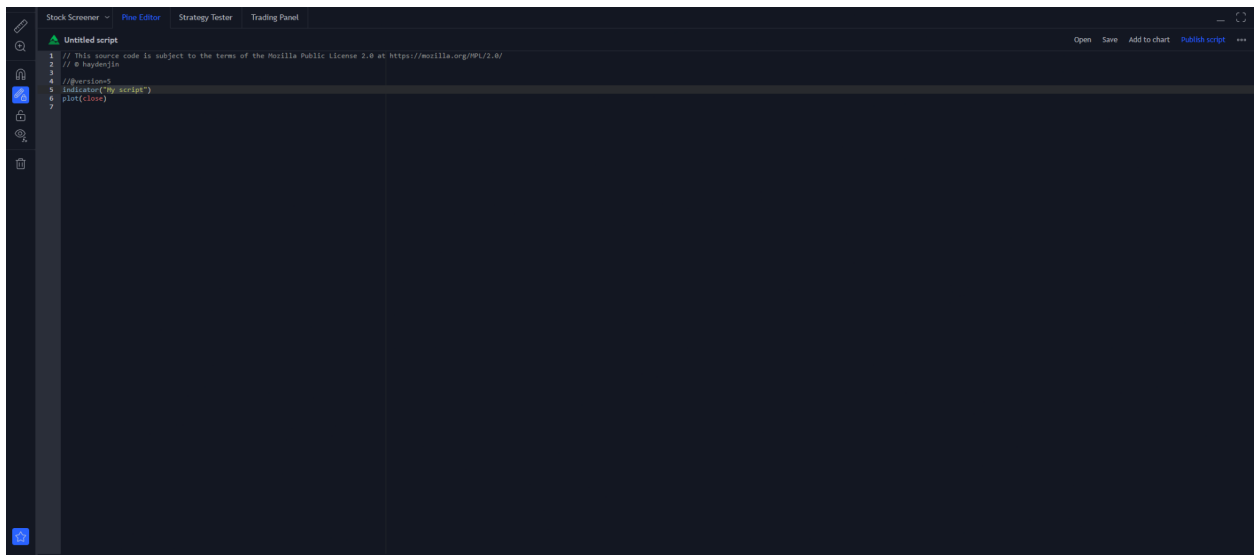

2. Look up any ticker (Ex. TSLA) and then click on view advanced chart if it does not automatically open

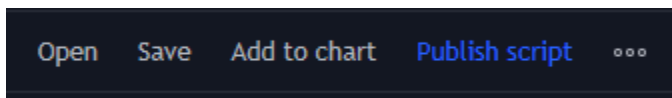

3. Once you are on the advanced chart, the screen should look like this

4. In the bottom left corner, click on the pine editor tab, this screen should now open

5. Delete everything from the page, and copy and paste the program code inside .
6. Then click save and "add to chart" in the top right corner of that window.

7. The system should now be running on the chart, you can close / minimize the pine editor window by clicking on it again.
